

Going to see the stoma
nurse

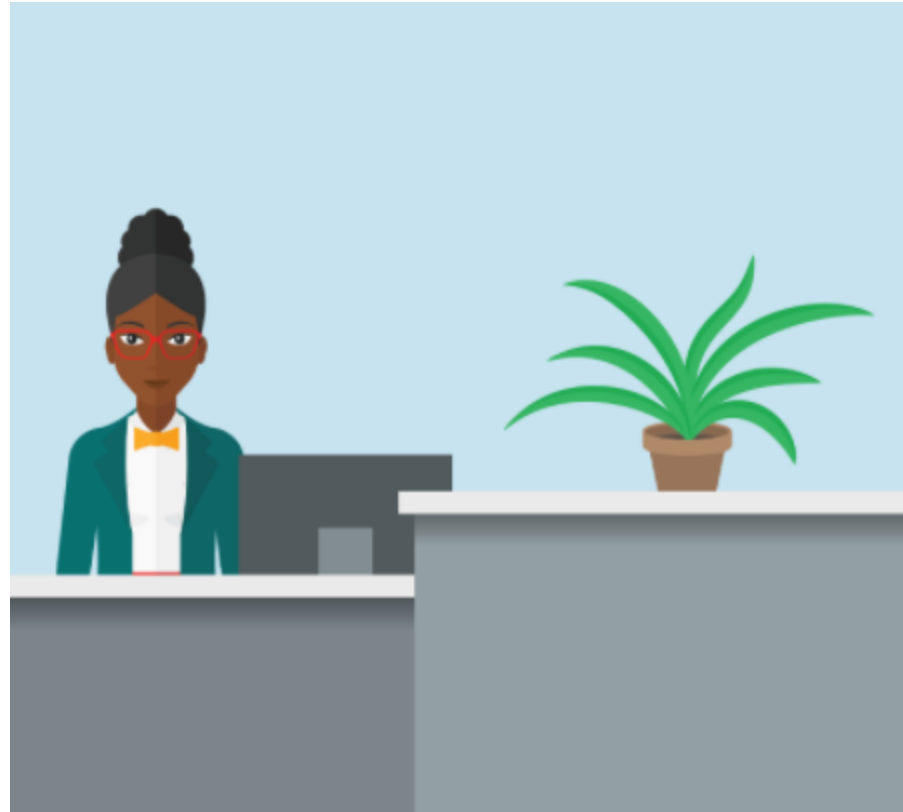

Sometimes, I might have to go to the stoma nurse.

The stoma nurse is going to check my stoma to make sure I am healthy and strong.

When we get to the clinic, we will tell them my name.

Next, we will sit in the waiting room while I wait for my turn.

When the stoma nurse comes in, they might ask me to sit on a bed. It is okay to sit on this bed. Being up high helps the nurse to see me better.

The stoma nurse will ask how I am feeling. I can tell him if anything is wrong.

The nurse will have a look at my tummy and my stoma.

If anything is bothering me around my stoma,
the nurse might check that too.

When we are all finished, the stoma nurse might give me a sticker for being a good patient.
