

Going to see the stoma nurse

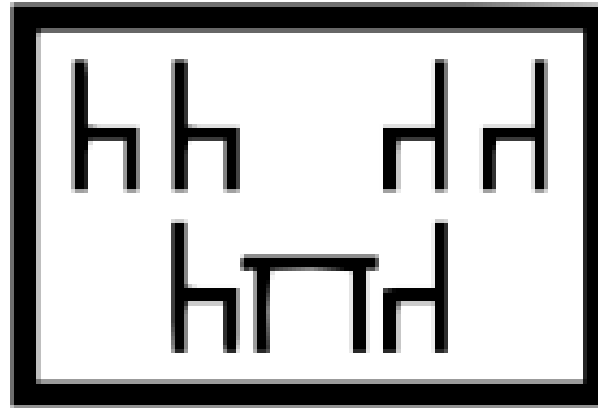

Soon, I will go to see the stoma nurse.

The stoma nurse's job is to see if my stoma is healthy. The nurse wants to make sure that I feel good.

When we get to the nurses office, we will wait until it is my turn.

Waiting Room

I can sit in a chair and read a book.

When it's my turn, the nurse will ask me to lie on the bed. It is ok to sit on this bed. Being up high helps the nurse see me better.

The nurse will ask to look at my stoma and skin around it, to make sure I am healthy.

When the nurse is finished, I might get a sticker for being a good patient.

Then, we are all done!
